Projects

Weather Dashboard: An app that displays the weather of the city that the user enters into the search bar, including current conditions and a five-day forecast. Search results persist using local storage. Made using the OpenWeatherMap API, along with HTML, CSS, and JavaScript.

- https://rekroetch.github.io/weather_dashboard/

Who's Hungry: An app that allows the user to search for restaurants when they want to try some place new. The app uses the APIs of Zomato and OpenStreetMap, along with Leaflet and MapQuest to provide information about the restaurants as well as directions to the place of their choice. App utilizes HTML, CSS, JavaScript, jQuery, and Foundation
